CINGHIE

Nel giardinaggio le cinghie hanno molteplici forme e dimensioni per adattarsi a svariati lavori ed a pulegge particolari con curve molto strette

- per questo motivo il materiale utilizzato è spesso il **KEVLAR**
- sulla cinghia è quasi sempre stampato il codice originale del costruttore oppure il tipo e la lunghezza espressa in pollici (1"=25.4CM)

Esempio **4LK-40** sta per cinghia **4L** in kevlar lunga **40"**=1016 CM

Si trovano spesso diciture particolari tipo:

- LA** = misura esterna della cinghia
- LW** = misura centrale della cinghia
- LI** = misura interna della cinghia

TIPOLOGIA E SIMILITUDINI FRA CINGHIE

Pollici	Tipo	Sezione
3/8"	Z	3L

Pollici	Tipo	Sezione
1/2"	A	4L

Pollici	Tipo	Sezione
5/8"	B	5L

Tipo	Sezione
AA	4L

STRUMENTO DI MISURA PER CINGHIA TRAPEZOIDALE

cod. Saba **0157-09108**

Come misurare la cinghia trapezoidale?

- Montare l'utensile di misurazione al muro in posizione verticale
 - Tendere la cinghia trapezoidale nella scanalatura dei due dischi a mezzaluna (parte posteriore all'esterno)
 - Tirare l'intera cinghia mentre si spinge il disco mobile verso il basso
 - Dalla fessura destra del disco mobile determinare la larghezza della cinghia in posizione 3L, 4L oppure 5L
 - Dalla posizione 3L, 4L oppure 5L determinare la misura della cinghia
- Pollici = 1" = 25,4 mm, 3L = 9,5 mm, 4L = 12,7 mm, 5L = 15,8 mm (larghezza)**
